

DESIGNED FOR PERFECTIONISTS

High-speed machining centers

The industry standard
takumicnc.eu

3-AXIS

H-SERIES: H AS IN HIGH-END

Compact, universal and dynamic high-speed portal machining centers for advanced requirements.

- Stable and rigid portal design for high thermal stability and great surface finish quality
- Compact design for minimal space requirements
- Excellent price / performance ratio thanks to comprehensive basic equipment

MODELS: H 6 / H 7 / H 10 / H 12 / H 13 / H 16 / H 22 / H 32

Product may differ from image

G-SERIES: THE GRAPHITE ARTIST

High-grade and particle-resistant – optimized for the machining of graphite.

- Fully enclosed working area including gradation for state-of-the-art graphite processing
- High level of shape and dimensional accuracy thanks to a compact portal design
- Comprehensive basic equipment for an excellent price / performance ratio

MODELS: G 700 / G 1000

Product may differ from image

VC-SERIES: A WORLD OF POSSIBILITIES

Mid-range bed type CNC machines.

- Affordable models – for a cost-optimized investment
- Compact design – for minimal footprint

MODELS: VC 0852 / VC 1052 / VC 1200

Product may differ from image

5-AXIS

U-SERIES: PRECISION COMES STANDARD

A high level of precision, thermal stability and maximum rigidity: U-Series models offer large, easily accessible working areas for less footprint.

THE PERFECTIONISTS U 400 / U 600

- Optimized for machining small and medium-sized workpieces
- High level of rigidity thanks to a portal design
- Thermal stability for long program runtimes
- Easy loading of workpieces thanks to machine doors that open wide

Product may differ from image

THE GRANDMASTER U 800

- Optimized for large and heavy workpieces
- High level of rigidity and less footprint thanks to a compact gantry design
- A-axis with torque drive on both sides, C-axis with torque drive
- Almost no backlash, exceptional axis thrust and clamping torque, low-maintenance

MODELS: U 400 / U 600 / U 800

Product may differ from image

Takumi U 800: Kessler swivel bridges with three torque drives

Takumi U 800: Fully enclosed working area

HEIDENHAIN CONTROL

The latest control system for
state-of-the-art production tasks

Heidenhain TNC 640

- Dialog programming
- ISO NC programming
- FK free contour programming
- Advanced milling and drilling cycles
- Touch probe system cycles
- Programming in parallel mode
- Integrated help system
- Simulation graphics
- Lookahead of up to 1,024 blocks
- ≥ 21 GB data memory capacity
- ≥ 2 GB RAM
- 15.1-inch LCD display
- Smallest input increment of 0.01 μm or 0.0001°
- 2 x gigabit Ethernet adapter
- 4 x USB ports
- RS-232-C and RJ-45 interface
- Expanded data interface for remote access
- Dynamic collision monitoring (DCM)

WE ARE TAKUMI AND ARE HERE TO HELP

Takumi is a technology leader in the development, production and technical application of high-speed machining centers. Customers and partners in Europe, America, Taiwan and China have been putting their trust in us for over 30 years.

The company

Takumi develops and produces CNC high-speed portal machining centers with a clear focus on mold and die. Our customers' needs are at the heart of what we do. Many years of close collaboration with users give us detailed insight into customers' requirements and into each of our product developments based on comprehensive market analyses. We always want to offer our customers a complete product line that is perfectly in line with their varied needs.

We produce high-quality, highly efficient machines made only from components from premium brand manufacturers and specialist suppliers that have often cemented long-term partnerships with us. Our production practices conform to demanding quality specifications and our quality management is certified in accordance with ISO 900: 2008.

Takumi has been part of HURCO since July 2015. HURCO is a technology leader in CNC control systems and machines that enjoys success around the globe. The US-based parent company with headquarter in Indianapolis, Indiana has production facilities in Taiwan, Italy and China and serves customers in Europe, Asia and North America.

Our customers benefit from this collaboration. HURCO GmbH Deutschland, which was founded in 1988 and is located in Pliening near Munich, has approximately 100 high qualified employees, making it a hub of expertise that manages sales and customer support throughout Europe.

The industrial areas

- Aerospace
- Automotive
- Energy
- Mechanical and plant engineering
- Mold and die
- Medical technology
- Optics
- Science and research

EIGHT REASONS FOR YOUR SUCCESS WITH TAKUMI

Decades of success

The Takumi philosophy

- A successful partner of industry and research for over 30 years
- Independent brand with independent product line since 2005
- Focus on mold and die
- Product development working closely with the customer
- Surface quality: Designed for the highest demands for highly precise workpieces
- Accuracy: Stable and rigid portal structure with resistance to high temperatures
- Direct drives in X / Y / Z
- In-Line or motor spindle up to 36,000 rpm
- Sales and customer support thanks to a experienced HURCO network since 2016
